

Dear Customers and Partners.

Seriplast
AT packaging

To better meet your needs and provide even more comprehensive services,
SERIPLAST IS INVESTING IN A NEW LACQUERING LINE,
operational from June 2025 at our Oyonnax facility.

Why this investment?

THIS LINE IS AN EXTENSION OF OUR TURNKEY SERVICES FOR YOUR FINISHING PROJECTS.

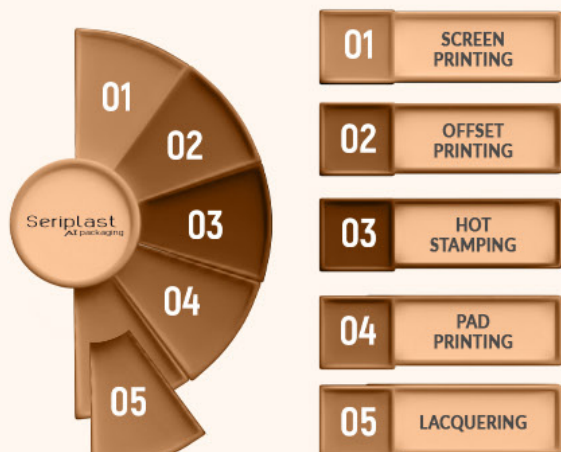

In addition to our existing services (screen printing, hot stamping, etc.), we offer you the possibility to realize the lacquering of your products (glass or plastic) directly at **SERIPLAST**.

Line specifications

In a few points.

- 56-meter length for optimized part processing.
- Two cabins, each equipped with four spray guns—a total of eight guns for high-precision applications.
- Capable of applying colored, transparent, or gradient lacquers to meet your aesthetic requirements.
- Suitable for lacquering parts either before or after printing, depending on your specific needs.

TOTAL DECORATION

A broad range of decoration options, enabling complete management of your project.

The benefits for you

- **Reduced waste and reworks**

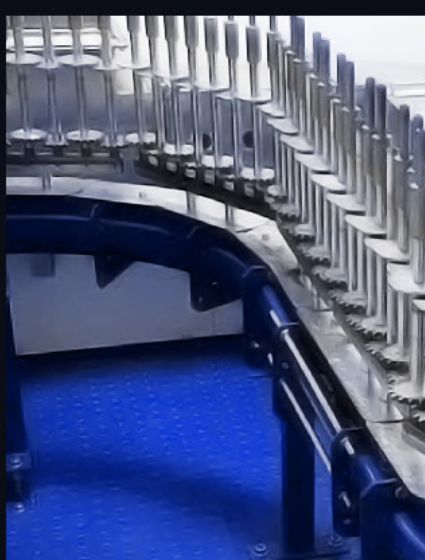

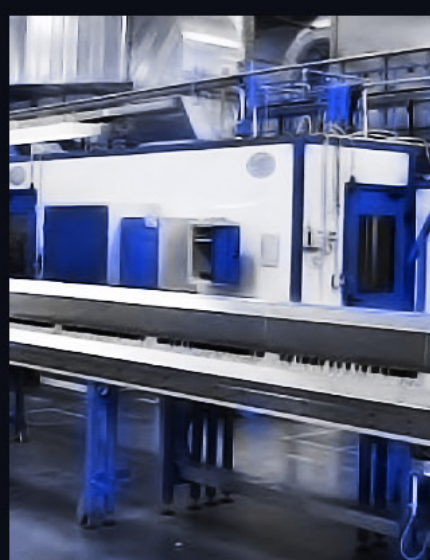

Better control of flows and quality.

- **Fewer transports**

A single partner for all finishing stages.

- **More peace of mind**

A complete solution to simplify your projects.
